Summer is here and so are the summer people. Some come for the mountains, others for the beaches. Some stay for the summer, others just for the weekend. Some come to spend their money — and some come to earn it.

As the annual migration begins, many Vacationland businesses are catering as much to their prospective employees as they are to the vacationers. For those employees, most of whom are students, summer means making money.
IN BRIEF:

TICK TALK

Lyme Disease creeps into Maine

A recent book about the Lyme Disease bug was published in Maine, as was a study that linked the disease to a particular gene.

ABORTION PILLS: New medicine for an old debate

As the Supreme Court Oral Argument proceeded this past week, a question was raised about the propriety of abortion. The question is whether the Court will reconsider its 1973 Roe v. Wade decision legalizing abortion. The Court's decision has been repeatedly challenged in recent years, and the question now before the Court is whether the abortion pill RU-486, a safe, effective abortion pill, should be allowed to be marketed in the United States.

As the Court's decision is the subject of legal argument, we are not able to discuss it in detail. However, we can say that RU-486 is a progestin that was discovered by researchers at the University of Tubingen in Germany. The pill blocks the action of progesterone, a hormone that maintains pregnancy. RU-486 was initially used to treat miscarriages in the 1980s, but it was later discovered that it could also be used to induce abortions.

In the United States, RU-486 is known as Mifepristone. It was approved by the FDA in 2000 for use in abortions up to 7 weeks of pregnancy. However, the pill was not approved for use in the United States until 2000. The pill is now available in more than 60 countries worldwide.

RU-486 is an anti-hormone used in the pill for the first seven weeks after conception. For normal gestation to occur, receptors located in the cells of the uterus will secrete estrogen from the placenta. Progesterone signals the uterus to prepare the lining and to hold the fertilized egg, but RU-486, when present, blocks these signals to the uterus, causing the egg to pass from the uterus. Abortion by RU-486 does not interfere with subsequent pregnancies.

Anti-abortion forces are concerned that the drug will change the nature of the political controversy by taking the heat off the visibly easy-access clinic practices that abortions are performed.

The “simple reality”

RU-486 is a pill that does not interfere with the development of a fetus as a non-steroidal anti-inflammatory drug (NSAID). The pill is not only safer and more effective than abortion pills, it is also less expensive. RU-486 will be marketed in the United States by a company that has already blocked the reproductive process in millions of women.

Summer Jobs

Working in Maine.

Summer Jobs is fun, but it's hard work, too. Many students find that summer jobs both fun and challenging, difficult and rewarding. While some students find summer jobs to be a source of income, others use them to develop strong friendships with other students.

For Bill Whitfield, the special relationships bring him back each year to the summer job he's held since 1982. "Bill Southwick," as it's affectionately known to his co-workers, is a manager at the South End Campground in Southwick, Massachusetts. According to Whitfield, the friendships he's made at camp are among the best he's ever had. Because Southwick is an all-male camp, the campers are all 15 to 19 years old and interested in different things. Whitfield says: "It gets to develop strong friendships with others." says Whitfield, "It's a lot of working on the beach and the campers are all very nice people."

The counselors teach kids in subjects ranging from French to American history. In the evenings, the campers participate in various activities, including movies and singing. The counselors help the campers learn how to work in a team and develop leadership skills.

For Christine McConville, a summer job is a way to earn money and gain experience. "It definitely helps with my summer job, making closer to $800 a week. This year, I'm making $100 a week and I'm glad I'm able to do this." says Christine. "I'm able to work around the pool and get a little bit of exercise, which is important."

For the counselors, summer jobs are both fun and challenging, difficult and rewarding. While some students find summer jobs to be a source of income, others use them to develop strong friendships with other students.

I'm watching blue pigment
sink off a sheet of Rice BFK
paper which is immersed in a
jar of water, hoping that the
right amount is coming off.
Donna Lee Billing is
looking at a younger student's
picture and marveling at another reja-
ray picture and thinking about
it on the apple. But remember,
you're not going to get hit
by blue mimicking colors with
this process.
This process is gum bi-
chromatic printing, a method
of printing photographs with
gum arabic that dates back to
a century old, hence the in-
thrust in Robert Schad's
Photography course at the
Portland School of Art's Con-
tinuing Education Program.
He worked our way through
cyanotype plus, blue tones
(electro-positive and nega-
tive) to gum prints, the tech-
ique constant for the print
and the application of the
process.
All the students are working
on prints. Some are working
on cyanotype plus, blue tones
(electro-positive and negative)
and gum prints. Robert Schad
instructed us in the process
and we are exposed to ultravi-
ololet light.
This brings us back to the
printing under water. Except
that the blue coloring was preceded by a red
and yellow coating. Each
"hull" is at least 30 minutes.
The paper fades slowly below
close, and the pigment needs
time before it is mixed. So you see
what I mean when I say com-
plicated. But wait, I take the
print out of the water. There it
falls off the light source
and remains in the darker
area. It's combined with the
red and yellow to make a "full-
color" image. It's my photo-
graph, but transformed into
something incredibly indi-
vidualized by using the prin-
ting technique of gum bi-
chromate. You can create this
"full-color" image through
gum bi-chromatic printing.

This is a delicate procedure, if
you're not careful you can
"burn" too much. But skillful
processing individualizes
a print. I've seen a fine back-
ground painted with a work-
shop to produce beautiful
pictures. Three processes are
demonstrated here.
For some photographers,
interpretation is a very
important step. They believe that this, cap-
ture, and preserve to the photo-
graph, should not be altered.

"Bigfoot Stole My Wife and Other Stories"
Theater for enquiring minds

It's frightening to see what people want to believe these days. For instance, every Saturday evening, after you finish dinner at your favorite Mexican restaurant, the news is going to turn in to hear the astonishing stories of the Tri-State Megabucks winning numbers. Wanting to win money isn't new, or bad, whole cities have been built for this purpose. It's just that same belief that winning numbers will change your life. And it's frightening to think that's what we believe, and what is actually true. It's an evening of comedy, that is, for the most part.

Maddie RegnierDeborah Milner, Michael Barnet, Cynthia Barnett, Walt DeForest, Randy Aronson, and Kevin Shane
This show is the last along with Mad Horse musical director Victoria Stahn-Stanly, who also serves as accompaniment for this line that is a hockey far as I'm concerned. It's an occurrence in your life that is acceptable and why, and the more they are, the more we believe in them. And there's no lack of them either. "Wonders, Wonders, Wonders," features Randy Aronson, Cynthia Barnett and Michael Rehn as clowns deemed to trap into idiocy, or until they no longer feel the need to believe in them. And there's no lack of them either. They are, in short, the people, the rope swing, and the music continue, and just plug along. Some poorly written than others. The songs are also written well, of course, by Elizabeth Hall, and aren't really necessary. And it isn't clear why Bigfoot makes an appearance at all. Anyway, we don't feel a need to explain this world again. Why do we need to believe in Bigfoot? And even if it were the case, doesn't the truth matter? What's the weather like today? Every day, it seems. It's nice, really. It's a pleasant day.

The rewards of dating in "Your Thing"
Producer Dori McElroy

"Your Thing" is a musical comedy that follows the lives of two friends, Jack and Jill. Jack is a struggling writer who dreams of finding the perfect scene for his next novel. Jill, on the other hand, is a successful real estate agent who is looking for love. The two meet and quickly become inseparable, much to the delight of their friends and family. The show is filled with music, dance, and laughter as Jack and Jill navigate the ups and downs of their relationship.

A. A. A. "Your Thing" 2019

The finale of "Your Thing" is a highlight of the show, as Jack and Jill face their biggest challenge yet. With the help of their friends and family, they work together to create the perfect scene for Jack's novel, and the results are hilarious. The audience is left laughing and feeling inspired by the power of friendship and love.

A. A. A. "Your Thing" 2019

"Your Thing" is a must-see for anyone who loves music, comedy, and a good story. It's a show that will leave you smiling and feeling grateful for the people in your life.

**NAME THAT ARTIST!**
Each week for six weeks Channel 24 along with Casco Bay Weekly and WCZ will be giving you three clues to help you identify this masked marvel. Unravel the identity of all six local artists and get your entries in time for the Old Port Festival on June 11. All correct entries will be eligible for prizes galore, including the Grand Prize, an evening out with the lovely lady of the week. "Out on the Town!"

This Week's Clues:
1. **Travel**
2. **Music**
3. **Creativity**

Tune into "Out on the Town!" for a visual clue. Portland's show case for local artists and entertainment, airs 7 p.m. weekdays 10 p.m. Tuesday & Thursday nights.

Send your 6 guesses to Channel 24, For a chance to win. Enter by Friday night P.O. Box 444 DTS, Portland, Maine 04101 or bring them to our booth at the Old Port Festival.
