Ski Express
Maine Ski Express aims to return ski fans back into ski marketing. By improving ski and associated products with a network and advertising, MSE reaches a critical departure from the norm. Too much of today's skiing has become cash related. We humans play second fiddle to "Where's the deal?", the "Ski Week Package", and blinding dayglow fashion. Whatever happened to the thrill of a first lesson, or the brush with perfection in the gates. Aren't the challenges and excitement the real means of the "Dark side"?

As Ski Pros, we are all addicted to the thrill of winter sport. But, we work with price, but we don't dwell with enthusiasm. Thus, we pay the MSE dividend of Maine based sport. Please send any appeal or writing of your own to MSE, cool and enjoy. But, you've got the rage!

-A conversation with Paul Leary

Paul Leary owns I Like It Like It, a 1960's-themed shop on the second floor of the Museum Building in Gorham. Violent mounting the shiny exterior of photographs by a trendy Janis Joplin, L.A. Express aims to put the soul of Maine back into ski marketing. By integrating ski and advertising, MSE represents a radical departure from the norm. Maimi is home to the world's largest water dance, with 10% of the state's population in attendance. The event is known for attracting thousands of participants who dance in unison to the rhythm of the ocean's waves. The event is free to the public and attracts both locals and tourists alike. For more information, visit www.maimiwaterdance.com.

The NAFTA vote. Mackie defended his actions, saying his

A review of the top news stories affecting Southern Portland

Maimi failed to submit a smog-cutting plan by Nov. 15 as required by the federal Clean Air Act. The state's failure is drawing criticism from a coalition of environmental groups led by the Natural Resources Defense Council, whose attorneys sued the state in court. The suit alleges that Maimi has failed to meet its obligations under the Clean Air Act.

The state Department of Environmental Protection (DEP) was supposed to submit a plan to cut air pollution by 15% over last year to the federal government. In fact, the state failed to even submit a preliminary plan by Nov. 15. Maimi's failure is a major setback for the state's efforts to comply with federal regulations.

The DEP has given Maimi until the end of the month to submit a plan. If the state fails to submit a plan, it could face serious legal consequences, including fines and legal action. The state has made progress in reducing air pollution in recent years, but the failure to submit a plan is a major setback.

Life during The Big Freeze
Mother Nature doesn’t take the winter off — she just digs in a little deeper

Paul Farrell

Winter comes to Portland. All you can think about are gray, wintry streets and pulling on extra layers. Everything seems to have flown the coop right. Right now, there’s not much to discover on the streets; the woods seem to be overgrown with snow. All the little tidbits that made winter such a joy are now buried beneath the ice. But there’s still a lot of beauty to be found in the midst of a winter’s storm.

This is Casco Bay Weekly’s feature on winter topics, take place on weekends in the local area, and are open to the public. These events are free and are designed to offer a look into the lives of people who live and work in the area.

For more information, visit cascobayweekly.com or call 287-3344.

Puck theater
continued from page 9

Winter is too short.

A professional or college hockey game is a break between periods, a 20-minute period, with a Christmas time between each period. High school hockey games have three, 20-minute periods. Youth hockey usually has three, 15-minute periods. The time between periods is usually self-organized for the bathroom, changing room or cold weather, warming rooms or bands, and so on.

If there’s still time left over near any of these, a Zamboni maintenance machine is used to warm up the ice, which freezes E a little new sheet of glass at Portland Phoenix games, you might even see a Zamboni lift into the arena section via a chute, or get a chance to shoot a puck through a tiny hole. It’s a lot faster away on a new truck.

Looking at the bright side, a good hockey game is an event at any level — but especially at the college level. The University of Maine, Bowdoin College, Colby College and the University of Southern Maine all have hockey games in the state from November through February. High school games are held from time to time.

And the Phoenix, one of the teams in the NHL, is in town on their way to the Stanley Cup final. They’re looking to shut out the Los Angeles Kings in the final matchup.

You have to wonder how many people have ever seen a Zamboni maintenance machine.

A winter's trail

Getting equipped

Winter hiking doesn't require the same investment in equipment as does skiing or snowshoeing. The only essential is a pair of sturdy boots. Leather hiking boots and a couple of pairs of socks are fine for typical winter weather. Add gaiters (fabrik-like nylon covers that clip to your boots and extend into your pants) thereby keeping out snow and moisture if there's more than a few inches of snow on the ground. Snowshoes are useful when the snow cover is more than ankle-deep, but some basic guidelines apply.

Rule number one: Layer your outfit, it's not the central investment in equipment as does skiing or snowshoeing. The only essential is a pair of sturdy boots. Add gaiters (fabrik-like nylon covers that clip to your boots and extend into your pants) thereby keeping out snow and moisture if there's more than a few inches of snow on the ground. Snowshoes are useful when the snow cover is more than ankle-deep, but some basic guidelines apply.

Rule number one: Layer your outfit, it's not the central investment in equipment as does skiing or snowshoeing. The only essential is a pair of sturdy boots. Leather hiking boots and a couple of pairs of socks are fine for typical winter weather. Add gaiters (fabrik-like nylon covers that clip to your boots and extend into your pants) thereby keeping out snow and moisture if there's more than a few inches of snow on the ground. Return of the ski meister in search of the all-around skier. Again.

By Gary Sayre

In recent years, the ski meister, a term used to describe a skier who excels in all areas of the sport, has become increasingly popular. The ski meister is not just someone who is good at one event but someone who can excel in all aspects of skiing, from cross-country to slalom. The ski meister is a rare commodity, and some believe that the best skiers are those who can do it all.

The ski meister is often associated with the old-time skiers who were able to ski everything from slalom to cross-country. These skiers were able to adapt to different conditions and were able to excel in different events. The ski meister is a symbol of the simplicity of the sport, and it is often associated with the idea of a pure skier who is able to ski for the love of the sport rather than for the sake of competition.

Despite the allure of the ski meister, there are challenges to finding an all-around skier. Skiing is a sport that requires specialized equipment and training, and it can be difficult to find someone who is good at everything. However, there are still skiers who are able to excel in multiple events, and they are often the ones who are most appreciated by the skiing community.

The ski meister is a symbol of the simplicity of the sport, and it is often associated with the idea of a pure skier who is able to ski for the love of the sport rather than for the sake of competition. The ski meister is a rare commodity, and some believe that the best skiers are those who can do it all.

As the jumps were dismantled, the ski meister category was no more. But even then, the ski meister remained a symbol of the sport, and it is often associated with the idea of a pure skier who is able to ski for the love of the sport rather than for the sake of competition.

The art of the fetal position

Surviving the season of deep denial

By Elizabeth Penney

Water is fine in a woodstove-y, nonsalubrious sense of picture-white, delicate. For, of course, it is the key to creating heat for four months. It is a Season of Deep Denial, a time to hunker down and curl into oneself, a rip opportunity to perfect the Art of the Fetal Position.

The position begins gradually as the windows close, that little, one by one, with a small inward arching of the fingers to the face — more often extended hands trying to reach heat. Next, one can wind around the body, as though daring the imaginary furry tummy. Next, the other arms return to the partner. The thin drops and phases into the chest from, the knees, now spread to a generous pull toward your elbows, until those paws touch. Lastly, one foot curves around and sprawls, side to side, with the other. You are in the back position for that great high dive into the deep that begins now in season.

You know you’re an ideal candidate for freezing, your water in the fetal position — from the moment your “other” hands lay on your aching, called hands and propel your body toward your own.
Looking for alternatives to toxic chemicals

End Maine's chemical dependency

Maine's chemical dependency on toxic chemicals based on the toxic release inventory, which was established in 1986 to provide information on releases of toxic chemicals by major U.S. manufacturers. The data shows that Maine is not alone in its reliance on toxic chemicals that can cause harm to both the environment and human health.

At the federal level, Congress should mandate planning for the reduction of toxic emissions and development of strategies to replace the chemicals they are using and producing. At the state level, Maine should follow Rhode Island's lead (through a revenue study) to mandate small companies, which can afford it, to fund environmental groups on staff.

Climbing on the rocks

In the last letter, the writer mentioned the frustration of not being able to climb due to the closure of climbing areas. The writer suggested that climbing areas should be protected as they are important for local climbers. The writer also mentioned that a sense of community is lost when climbing areas are closed.

Climbing is a sport that requires skill and practice, and it is important to protect the environment to ensure that future generations can continue to enjoy this activity. The writer is correct in stating that climbing areas should be protected and managed to ensure their continued use.

A view of the future

Looking back on the 1980s, it is clear that we must continue to work towards a more sustainable future where toxic chemicals are replaced with safer alternatives. The writer's concern about the future of climbing is a valid one, and it is important that we continue to support and protect our climbing areas for future generations.

Letters to the Editor:

Maine's chemical dependency on toxic chemicals is a significant issue that needs to be addressed. The writer's concern about the future of climbing is a valid one, and it is important that we continue to support and protect our climbing areas for future generations.

Not just another band from East L.A.
Los Lobos, a band organized 20 years ago to play weddings and such in East L.A., released their seventh album last year. "Kiko" was arguably the finest rock recording of 1992; it was undeniably their finest work. It wasn't a statement - some overproduced, fatigued beast of a recording, the type that usually occurs when a band has lingered on the sidelines of mass popularity for years. Nor was it the kind of self-conscious reappraisal that lesser bands, artistes, attempt at this sort of juncture in their careers. "Bat Out of Hell Part II" will have to wait. Los Lobos presented "Kiko" as just another book of short stories, albeit more mature stories, which reflect the band's maturing intelligence.
Be informed, get involved & stay amused.

Thursday
Chamber made: The UNIVERSITY CHAMBER ORCHESTRA presents a special concert at 8 p.m., in the Portland Center for the Performing Arts, 5 Convention Plaza. The program includes Mozart's 'Symphony No. 25 in G.' Mozart, Beethoven's 'Concerto in D major' for violin and orchestra, and a piece for string quartet by Joseph Haydn. $3 ($1 for students and seniors). 726-6800.

Saturday
20
Small craft advisory: The MAINE DEPARTMENT OF MARINE RESOURCES issues a small craft advisory for Saturday, with 15-foot wind waves possible in the Gulf of Maine. 790-2800.

Saturday, November 21
10 a.m.

Cynthia Gibson, author of "Botanical Tomb: a beautiful book of Dissecting, Gardening, and Entertaining" will sign her book and give a floral arranging demonstration.

Not just another band from East L.A.

Los Lobos drummer Louie Perez says about the writing process, "My best work happens when I'm driving the car, or taking leases, or something. It's part of your brain that isn't connected to reality. When I listen to that part of my brain, part of me is surviving, doing what I have to do, and the other part is wild. It's something we all have, but because of our routine and other demands and pressures we ignore that creative side. As a kid, we built up a tougher skin, a kind of armor. We don't allow it to come out enough. But every now and then it happens and we'll write songs or paint pictures... That search for innovation or a pure creative sensibility is what establishes Los Lobos as the birth of a short line of bands that reflected the twofacing ideal of post-World War II American Creativity. Creators.

Charismatic Revolutionist. The band (though not originally American and not entirely interesting after their three initial recordings) and Little Feat compose a triumvirate who produced quintessential American music in the same way Sousa, Copland and Gershwin did for earlier generations. With these rock bands there is a shared emblem of Hispanicity, which is framed by expressions: There are deliberate but rarely banal rhythms that belle. their obvious absorption in a repertory of styles. These trends of folk, blues and country drift through their collective music, which are not even understood and mainly ignored. Without putting too much stock in those bands and collections of ourselves. How can we add to the list a band such as Los Lobos, whose most famous song to date was an amiable remake of Ritchie Valens' hit "La Bamba" (which was simply a reworking of a traditional Hispandic song) and whose most recognizable record prior to "Kiko" was an all-Spanish language recording from the early-70s, which was essentially a valentine to their bands work.

Los Lobos' first album was the independently produced "Just Another Band from East L.A." showing its roots from a Mother of Invention album released years earlier. It pleased Los Lobos in the same L.A. rootsollar that gave us X and The Meters. In the late 70's, L.A. was becoming a response to a dead-end, hard-core scene that had briefly flickered in California. Before speed metal, before Guns N' Roses, it was and before the self-involving metal scene that followed, there were a couple years of pure imagination. Blood on the Saddle, Love Justices, The Knitters all arrived and then with little notice burned out. Los Lobos had been together a dozen years by that time. They played anywhere that would have them — VWV and America, Legins Hall — and could contain their blend of blues, rock and Hispanic roots music, which Perez has called "the soundtrack of the barrio."

In the 15 years since their wildly teething debut, they have produced songs for soundtracks, they've joined everyone from Scorsese to R. Stevie Moore's annual to evaluation of Disney's "They Asked," and they have released another five albums plus a new extensive retrospective of their long career. Each release either a version of their ever-expandingもしめthroughout their 20 years as a band, they have mined the core of American music and defined its center for others. Their understanding of their Mexican roots marks them as an ultimately defining American music this decade.

David Hidalgo, the fingering of a front man (guitarist, accordion player and vocalist) whose voice is one of the purest in pop music, once told me he and Aaron Neville (the one who understands exactly what is meant by "it's always been about us trying to take something new to take it to a new place... that's what matters."

Hidalgo and the other long-standing members of Los Lobos do take the music anywhere. But it's their appreciation for all the music that has come before that establishes Los Lobos as the archetypal American band.

Remembering Manny

Portlanders were shocked and saddened by the news that Portland native and icon of the city, Manny Venegas, had died Dec. 13 in a Wyoming highway crash. Venegas was 55. Venegas was born in Portland and moved to Los Angeles, where he lived for many years. According to a longtime friend, Venegas had just received a promotion and was on his way to a new job at his Los Angeles law firm. Venegas had recently been working in the music industry, both as a lawyer and a music executive. Venegas was a respected figure in the music industry and was well known for his dedication to the local music scene. He had been a regular at the New York City venue, and his death was a great loss to the music community.

Post script: the new trend in composition of the future is...

Advice for new customers

1) Allow plenty of time. There are thousands of beads to choose from and designing and making jewelry is more fun than sewing. Once you’re more successful when you’re not feeling rushed.

2) Our busiest times are weekends before lunch. If possible, come in on a weekday when you have less crowd and it will be easier to get you personalized help and instruction.

3) Bring along a friend! Our workable also serves as a place to sit, relax, and chat while making lovely unique gifts for the holidays. Hope to see you soon!

**Skiing for junior powder hounds**

**Portland Recreation offers ski options for city kids and teens**

The city of Portland’s Recreation Division will host a series of ski trips for children and teens throughout the winter season. This includes transportation to the ski areas on Maine Line Tours and lift tickets. Equipment rental is extra. A minimum of 10 registrations (5) are needed for each program. Programs that fall short of registrations will be offered at higher cost to cover bus rental costs. If 10 registrations are not received by the registration deadline in Dec. 13 for the trip series, Jan 30 for the smug program.

Register through the mail or in person at City Hall beginning Nov. 28. For registration forms or more information, contact Ted Musgrave at 874-4096 or 874-4671.

(Portland Recreation also seeks winter camp opportunities for the town’s ski local program. This commitment is for the entire 7-week ski program, and includes free skiing and rentals, if needed. Chaperones are also needed on a per trip basis. Please contact Ted Musgrave for more information.)

**Portland Recreation offers ski options for city kids and teens**

The city of Portland’s Recreation Division will host a series of ski trips for children and teens throughout the winter season. This includes transportation to the ski areas on Maine Line Tours and lift tickets. Equipment rental is extra. A minimum of 10 registrations (5) are needed for each program. Programs that fall short of registrations will be offered at higher cost to cover bus rental costs. If 10 registrations are not received by the registration deadline in Dec. 13 for the trip series, Jan 30 for the smug program.

Register through the mail or in person at City Hall beginning Nov. 28. For registration forms or more information, contact Ted Musgrave at 874-4096 or 874-4671.

(Portland Recreation also seeks winter camp opportunities for the town’s ski local program. This commitment is for the entire 7-week ski program, and includes free skiing and rentals, if needed. Chaperones are also needed on a per trip basis. Please contact Ted Musgrave for more information.)

THE STATE THEATRE PRESENTS

OPENING NIGHT

November 20th
LADIES AND GENTLEMEN it's SHOWTIME

Headlining this gala event will be Krisis and Canoes, this Portland-based band featuring singer Carol Namur, keyboardist Alan Williams, and guitarist Rick Harris has built a substantial New England audience. Their two independently produced and marketed albums have sold over 5900 copies and their live performances have attracted rave reviews. The band recently signed a potential 7-record contract with Island Records and is currently in Muscle Shoals recording their first nationally released recording. The band's eclectic songwriting ability featuring rock, folk, and country has catapulted this local band to national prominence. Welcome them back to Portland and see what excitement this band generates.

Also on the bill will be Don Campbell with accompanist Dave Rowe. A popular performer that you probably heard on WCLZ, Don is another local talent poised for national recognition. Don's original style of new grass, and folk and roll will both surprise and delight you.

ORGAN LOVERS, the incredible original Wurlitzer organ will be fired up for the first time in 30 years. Watch the popular organist Bill Picker step out of the orchestra pit and dazzle you with the incredible sounds of this vintage instrument.

Master of Ceremonies for the night will be Bob Elliott, popular local folks host for WCHL Channel 6. Bob has taken a special interest in the State and will be presenting a special film narration of the rebirth of the State Theatre.

Tickets go on sale Nov, 10th, 10 AM, ONLY 800.

Show begins at 8pm
Doors open at 6pm

WAVERY MILLS
HOW DID THE STATE THEATRE SURVIVE?

In 1939, the State Theatre opened as the first combination vaudeville and sound movie theatre in the State of Maine. Officially named the Empire State, it featured a state-of-the-art theatre in conjunction with movie releases.

Screentalk was very popular in the 30s with variety shows, and the State was the first theatre to be acoustically designed to show “talkies.”

Development in movie screen technology was also introduced at the State. Known as “sonorama,” which was billed as the “New Movement Screen” soon to become standard for the movie industry. Congress Street became 7 theatres during the golden era of both films and live programming during the ’30s & ’40s. The Portland, The Capitol, The Empire, The Maine, The Strand, and The Casino were only a distant memory.

The State remains because of a unique coincidence and a bit of luck.

The State started off with a mix of vaudeville and sound movies but because it was Portland’s largest theatre over 2200 seats, quickly became almost exclusively on cinema. Stars like Betty Grable, radio shows, and community events became integrated into the movie theatre.

The ‘30s signaled the decline of the State Theatre with competition from new vaudeville theatres. In 1969, a 20 year lease signed with a Boston-based film distributor which after a short time switched their programming from family oriented to the new adult oriented films.

The lights went out again at the State. After 3 years of waiting for another person or public venture to see the potential of the theatre, the Kampfs decided to plunge into the project themselves. They hired a creative architect and a general manager who knew the local music scene. After examining the local community’s needs, the most viable option was to open a mid-size theatre designed to complement various contemporary venues. This exciting new chapter combined the original beauty and grandeur with the elements of contemporary performances and expectation of audiences well into the 21st century.

This supplement was produced by the advertising department of Casco Bay Weekly. Text supplied by State Theatre.
