This Book is brought to you for free and open access by the Reports and Planning Documents at Portland Public Library Digital Commons. It has been accepted for inclusion in General Reports by an authorized administrator of Portland Public Library Digital Commons. For more information, please contact schechter@portlib.org.
Everyone is encouraged to participate!

**Community Planning Workshop to Be Held**

Your help is needed to shape a Neighborhood-based Plan! This planning workshop offers the best opportunity for all Peaks Island neighbors to have their opinions about the Island heard and included in the plan.

For the past five months, a dozen task teams (see p. 2) have been collecting and researching data, and developing lists of issues in an effort to present a series of future options to the community. August 4th will be the time for your comments and suggestions. During the Workshop, each task team will display its findings at individual dialogue tables. Community members will move from table to table to discuss research results with the team members and add their own ideas and suggestions. And everyone will be asked to contribute to a Vision of Peaks Island in 2020.

All this information will be compiled by the task teams, and then edited and written into a Draft Neighborhood-Based Plan for review and comments by the community in the Fall. Please help us decide the future of our special Island! Once it is complete, our Plan will be sent to the City of Portland’s Planning Department.

**Islanders Hear Survey Results**

About 40 Island residents attended a meeting on June 19th to learn about the results of the Community Survey. The Survey results were presented in both graphic and verbal forms. Islander Jenny Yasi, Nate Gray (Island Institute Intern), and Tom Fortier (Portland’s Island liaison) explained some of the highlights of the Survey results. One important fact is that 561 surveys were returned by Island property owners and voters, an astounding 55% rate of return!

**Copies Available at Library**

Nate Gray has typed all the data responses into a database, including pages of written comments that were part of the survey responses, and created all the handsome pie charts that made the data more understandable. He described the locations for storing both the original survey forms and the transcribed data. Electronic and paper copies of the survey will be available on reserve at the Peaks Island Library, as well as at City Hall and the Portland Public Library. These copies of (continued on page 2, see ‘Island Survey Results’)

tory, but will be password protected and cannot be altered. Copies of the summary results were handed out at the meeting and can be found upstairs in the Library.

Jenny Yasi, who has pushed the survey process from begin-

The Task Teams: an Update

Population [Nancy Hall, Nate Gray]: Compiled Census 2000 data about Peaks Island and made it available to other Teams.

Water, Topography & Soil Resources [Art Astarita]: Developed map of Island’s 25 watersheds and is compiling additional information about groundwater resources.

Natural Resources [Lynne Richard]: In the process of conducting field studies of the Island’s various natural habitats.

Marine Resources [Curtis Rindlaub/Nate Gray]: Have outlined marine resources and facilities; also addressing preservation of access to coastal waters.

Historic and Architectural Resources [Kim MacIsaac]: Collecting information on historic cultural and architectural resources and assessing community character.

Land Use Patterns [Dick Springer/Nate Gray]: Gathering land use information describing current and projected development patterns; analyzing building permits, zoning codes.

Housing [Keith Hufts/Marjorie Phyte/Dick Reed]: Developing an inventory of residential buildings and considering future needs for affordable housing.

Transportation [Nate Gray]: Collecting information on Island transportation needs and systems, and exploring alternatives.

Recreation & Open Space [Don Stein/Nancy Hall]: Identifying public shore access points and recreational opportunities that are free to the public, involve membership in an organization or involve Island Businesses.

Public Facilities [Peter Deane]: Developing data on public facilities and their usage, especially public services necessary to protect the environment and the health, safety, and welfare of the public.

Economy [Nate Gray]: Reviewing neighborhood data including Island employers, and assessed value of residential, commercial, and tax exempt properties.

Relationship with City [Bill Hall]: In the process of interviewing both Island and City officials about the adequacy of Island representation within city government.

Images [Barbara Hoppin]: In June organized photo exhibition of Peaks Island.

Vision Statements [Cynthia Cole]: Interviewing a sample of Island residents and planning a presentation for the August 4 Workshop.

The next issue of this newsletter will appear in late August.

Look for more information about the task teams later in July.
